Co-Chairs’ Proposal

Based on the assessment of PARIS21 administered PRESS and the comments of partners on the assessment report, the Co-Chairs propose that the Partnership will use PRESS as its primary information sharing mechanism. This will entail that:

- Starting with the 2012 PRESS cycle, all partners will use the online PRESS questionnaire to report ongoing and future projects and programmes to PRESS involving one or more countries in the Asia-Pacific region.

- Starting with the 2011 PRESS cycle, PARIS21 will make the online questionnaire accessible throughout the year (with the exception of July-October) for Partners to update their submissions.

- Starting in December 2011, PARIS21 will publish an updated set of PRESS data in December and March of every year.

- During 2012-2013, PARIS21 will explore ways to establish a “real-time” database that would allow partners to access information as it emerges.
